1952 BULB CATALOG

RURAL ROUTE 4, LAKEWOOD BLVD., HOLLAND, MICHIGAN

Member National Tulip Society

PRICE 25 CENTS

Tulip Time in Holland, Mich.

It is Tulip Time in Holland, Mich., in the month of May. Festivities this year are scheduled for May 14 through May 17. Under normal weather conditions our bulbs should be in bloom from about May 10 through May 25. You are cordially invited and very welcome to visit our display any time during this period. If you wish to make certain, call us (Holland 6-7888) or drop us a card and we will gladly inform you of the best time to come.

Our 1952 listings represent a sincere effort to catalog both the old favorites and a number of additions. If some of your favorites are not listed here, let us know early. We may have them or be able to obtain them for you.

IMPORTANT TERMS AND CONDITIONS OF SALE

Cash with order or 25% deposit, balance C.O.D. at shipping time.

Most prices are given in lots of 3, 12 and 100. You may purchase 6 bulbs of any variety at one-half the dozen price, 25 bulbs at twice the dozen price, or 50 of any variety at one-half the 100 price.

Planting instructions will be furnished with each order.

Only high-quality, full-size bulbs producing satisfying results will be supplied. In tulips, under normal conditions, this size is 4 to 5 inches in circumference, and not less than 4 inches. A few varieties, such as most botanical tulips, have smaller bulbs.

SECTION 1.

Orders under \$3.00, add 25c service charge. Over \$3.00, no additional charge.

SECTION 2.

Orders under \$3.00, add 35c service charge. Over \$3.00, add 4% to net total.

SAVE 10% BY ORDERING EARLY

Every single bulb is reserved for a particular order. By ordering early you assure yourself of receiving the bulbs you want and at the proper time for planting. In all parts of the country planting may be done about October 1 and thereafter, as long as the ground is workable. Bulbs that should be planted earlier will be shipped earlier, and will be so marked. To encourage *early orders*, we allow a discount of 10% on all orders placed and paid in full on or before June 30. If you wish, the amount of the discount may be used for obtaining additional bulbs.

GUARANTEE. We guarantee all Van Bragt bulbs to be of highest quality, true to name, and capable of producing flowers of exhibition standard. Bulbs not reaching you in good condition will be replaced. Do not return any bulbs unless we wish to have them for inspection purposes. "Our aim for our gain is satisfied customers."

May-Flowering TULIPS

This list provides a wide choice of time-tested varieties that have been developed by interbreeding Darwin, Cottage and Breeder Tulips. We are also listing in this group the Triumph and Mendel Tulips, identified by the heading "medium blooming." For your convenience in ordering, we have grouped the varieties according to their predominant color.

Multiflora DUTCH HYACINTHS

Last year was our first to list the Multiflora Hyacinths, which are similar to the illustration at the right. We have had good reports from the results obtained, even though not all bulbs produced eight blossoms. Most of them appear to have had between five and seven fairly good-sized flowers. All of them had at least two big stems with as many as 18 individual florets.

These bulbs are exceptionally well suited to indoor culture. They may be planted any time after October 15 indoors, or from September to December for outdoor bloom. A few of these planted in pots make an ideal small gift. Three colors: Rose, White and Blue. Each bulb is packed separately, with cultural instructions. **No orders accepted after July 20.** Each 60c; 3 for \$1.50; 12 for \$5.50.

Additional Hyacinths are listed on page 28 and the back cover.

SPECIES OR BOTANICAL TULIPS

FOSTERIANA, RED EMPEROR

Effective for rock gardens and hardy borders. These enjoy semi-shade more than any other Tulips. Once established, they require no further care and will be a never-ending source of pleasure.

Crocus

The sight of exquisite Crocuses blooming in the melting snow is a sure sign of spring. They should by all means have a place in every garden, lawn and woodland. They are attractive in rock gardens and under shrubs and perennials that are barely showing the first signs of life in the spring.

Crocuses are of the easiest possible culture. Just plant them in the fall, about 4 inches deep, in scattered fashion. Do not mow or cut the foliage in the spring until it has completely ripened. It is not necessary to dig up the bulbs and replant them until the clumps become too crowded.

Available in three colors: White, Blue and Yellow.

• • The Glamour Bulbs • •

Requests often come to our office for outstanding Narcissus and Tulip varieties. Sometimes garden club members want something specially recommended for show purposes. Hobbyists frequently need "something extra" for their beautiful gardens. Fortunately, we are in a position to list a few of these particularly desirable varieties. We have cataloged many of them before and they have proved to be exceptional show specimens.

Because of the small stock available, we must limit the time of ordering. **Therefore, no orders can or will be accepted after July 20.** The prices given are net. No discount allowed on any of the varieties listed on this page.

NARCISSI

	Each	3	12
GRAPEFRUIT. (Trumpet) Well-proportioned, beautiful flower of pure lemon color. An exceptional striking novelty for shows.	\$3 50	\$9 00	
PHYLLIS MILLER. (Trumpet) A clear yellow perianth with overlapping petals and large golden yellow trumpet. One of the better newcomers among the giant yellow trumpets.	4 50	12 50	
ANNY VIRGINIA. (Incomp.) Deep yellow perianth with widely expanded, orange cup. Very lovely and perfect. Unexcelled for show purposes.	2 50	6 50	
BERMUDA. (Incomp.) A name reminiscent of sunlit shores and honeymoons. Large, lemon-yellow perianth with enormous, all orange cup. Very large, distinct and perfectly shaped flower.	2 00	5 00	
OKLAHOMA. (Bicolor Trumpet) A vision of pure white and deep orange. The only existing bicolor with an orange-yellow cup. Makes a lasting impression. Perfect, pure white perianth with large, deep orange-yellow trumpet. An "easy on the eye" variety.	13 00	36 00	
AMATEUR. (Barrii) Overlapping white perianth with a very nice, large, flat, all orange cup. Considered tops in this class. Once seen, never forgotten.	1 50	3 75

HYACINTH GLASSES

These attractive glasses will fill the need for a means of growing Hyacinths in water indoors. It is a simple matter; full instructions will be furnished with the glasses. The best bulbs to use for forcing are the White, Red, Yellow, Pink and Blue Hyacinths. Glasses available in three colors: Crystal, Amber, Light Blue. \$1.00 each; 3 for \$2.75; 6 for \$5.00, postpaid. (Bulb not included.)

GRAPE HYACINTHS

Double, Dutch HYACINTHS

As with the Multiflora Hyacinths listed on page 24, these Double Hyacinths were listed by us for the first time in 1951. We were "swamped" with orders, and consequently we had to disappoint many late buyers. Our stock is not too large this year either; so if you wish to try a few of these, please order early. Three colors: Rose, White and Blue. 3 for 85c; 12 for \$2.75; 100 for \$20.00.

Refer to page 24 and the back cover for additional Hyacinths.

Grape Hyacinth

MUSCARI

One of the daintiest and most appealing of all the small spring bulbs. The beautiful blue color is perfect with the cream, yellow and orange tones of daffodils. The bulbs should be planted in masses and left alone year after year, to form a naturalized effect. Plant the bulbs in the fall in groups, 2 to 3 inches deep, in full sun or partial shade.

Planting Instructions

TULIPS

Any ordinary garden soil is suitable for Tulips, provided it is in good condition and well drained. If the soil is heavy, mix sand with it or plant the bulbs in a layer of sand. If the soil needs enriching, use WELL-ROTTED or dehydrated cattle manure or any good garden fertilizer, being careful to follow instructions on the fertilizer container. Work the fertilizer through the soil, or spread it over the top, allowing it to soak in during the winter months.

Plant from October 1 until the ground is frozen and no longer workable. We will ship your bulbs in plenty of time for planting. In southern United States the planting time extends into December and January. We suggest that you refrigerate the bulbs in areas where freezing temperatures are not experienced. Four to eight weeks before planting, place the bulbs in your refrigerator. This allows the bulb to form a good root system soon after planting, which is essential to produce a sturdy plant.

When the ground is frozen solid—not before—cover with a thin layer of straw or hay. In the spring keep the soil loose and clean. After blooming, remove the seed pods. Allow the foliage and stem to turn brown before you lift the bulbs. Dry the bulbs indoors. When dry, store in a cool, dry place, making sure that no sand remains. Prevent molding by storing them in thin layers in open crates, or onion and orange sacks. Remove roots and loose hulls before planting again in the fall.

Botanical Tulips may be left in the ground for years if they appear to have found conditions to their liking.

HYACINTHS

Plant Hyacinths as soon as possible after receiving the bulbs, preferably in a light sandy soil, about 4 to 5 inches deep from top of bulb, and 5 to 7 inches apart. In heavy clay, we recommend loosening soil with sand or sandy mixtures. Hyacinths require a slightly heavier protection during the winter; otherwise their culture is like tulips. Drainage, as with tulips, is most necessary.

MINIATURE BULBS

Bulbs such as Chionodoxa, Scilla, Muscari, Crocus, etc., should be planted 2 to 4 inches deep, and may be left undisturbed indefinitely. For this reason they can be planted almost anywhere, such as in rock gardens, borders, between shrubbery, in wooded sections, etc. They require little or no attention.

In many cases Crocuses are planted in lawns. For best results, the lawn should not be cut until about three or four weeks after the flowers have faded.

NARCISSUS OR DAFFODILS

Narcissus do well in almost any soil but prefer a deep loam. Do not use any manure or strong fertilizers. They will grow equally well in full sun or shade and should be planted 5 to 6 inches deep and about 6 inches apart. They can be left undisturbed for three to four years. If you wish to transplant them, do not store, but divide and replant at once while they are still moist. If you must store them, keep in a cool, airy place. Hot, dry temperatures cause a disease called basal rot, which destroys them very quickly.

A WORD OF CAUTION

Do not grow Tulip bulbs year after year in the same place. Sooner or later they may be attacked by a fungus called fire blight, which attacks both foliage and flowers. Change either the soil or the location; in other words, follow the principle of crop rotation.

Do not let seed pods remain on the stems after flowers have faded; these weaken the bulbs.

Dutch Hyacinths

Early in the spring, as the snow begins to disappear, Hyacinths will brighten your garden with an abundance of color and delicious fragrance. They are extremely attractive in any garden, either in beds and borders by themselves or combined with other spring bulbs. Large bulbs only, in these colors: **White, Pink, Red, Sky-Blue, Dark Blue, Yellow, Orange, Lilac.**
